FAIRERPOWER'S PRICE DECREASE AFFECTING NEW & RENEWING CUSTOMERS

06 JUNE 2017: Following a downward shift in wholesale commodity costs, Fairerpower today announced an 4.6% (£46) price decrease on its fixed tariff [1]. The move will affect all new and renewing customers signing up to Fairerpower's 12 month pay-monthly Fixed tariff and is largely a reflection of a 6.9% decrease in gas and 20.7% decrease in electricity costs since November.

Following the price decrease, Fairerpower's price for a dual fuel customer will now be £951 [2].

Fairerpower reviews its prices on a regular basis, passing back savings to customers whenever possible and this price change largely reflects movement in the cost of supplying energy to its customers over time. This cost reflective pricing sits at the heart of the company's promise to customers that the deal they are getting from Fairerpower will always be fair, transparent and as competitive as possible.

The increase takes effect at 00.01 on 06 June 2017.

---Ends---

Notes:

Today's price increase is on Fairerpower's Fixed pay-monthly energy plans. Fairerpower's Standard Variable and PAYG (pre-payment) tariffs will not change at this time.

Price comparisons are made using Fairerpower's cheapest non-Economy 7 dual-fuel tariff at the relevant time (including all available discounts, paying by direct debit in advance and averaged over all available regions) compared to an average of the Big Six Standard Variable dual-fuel tariffs (excluding online discounts, using a variety of payment methods including direct debit and averaged over all available regions).

The "Big Six" are E.ON, SSE, British Gas, Scottish Power, Npower and EDF.

[1] Compared to our current average medium use non-Economy 7, Fixed tariff.

[2] £951 is the annual cost of Fairerpower's fixed 12-month energy plan for a dual-fuel medium user (3,100 kWh electricity, 12,500 kWh gas) paying via any payment method, including VAT, when averaged over the regions in which that tariff is available. Effective 06/06/2017.
